

Mobile View

 Attach Add a child issue Link issue

Description

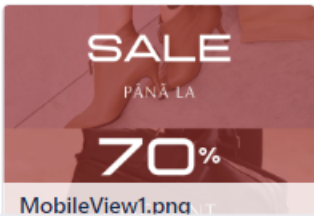

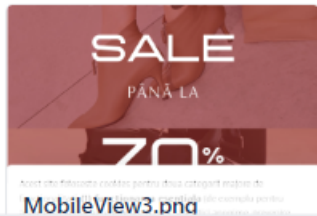

As a mobile user of <http://annacori.com> website I expect to see the main page with the same functionalities and the same responsiveness as a web user.

The UI elements should be arranged so that it does not impacts in a negative way the user experience.

Acceptance Criteria:

- Responsive design
- Media flexible - images used within the main page should have the same quality as on the web
- A popup banner that is displayed on homepage to ask user for consent for the use of cookies
